Use Aloe Vera gel or cold compress to soothe skin

Stay hydrated by drinking lots of water

Avoid fragranced lotions or perfumes on treated areas

Stop all hair removal methods except shaving

You can resume using retinol products & similar after 2 weeks

FALLON AESTHETICS

FINDING BEAUTY IN IMPERFECTIONS

After the procedure some other common injection-related reactions might occur. These reactions include redness, swelling, pain, itching, bruising and tenderness at the injection site. They have generally been described as mild to moderate and typically resolve spontaneously after a few days after injection. Bruising may occasionally be more significant.

If you have any concerns following treatment, do not hesitate to contact us on 07907 005255. If this is outside of normal hours, please leave an answerphone message and we will normally get straight back to you.
